🔍 Abstract: [From equivalent [EP0931476A1](#)] Container/applicator for product in powdered, liquid or paste form Container/applicator comprises a reservoir (4) for the product (P), an applicator (3) with a tip (48) pressed elastically against the product, and a compensator (30, 34) adjusting the pressure to a pre-determined and constant value as the level of the product in the reservoir falls during use. The compensator consists of a threaded rod (36) or rack operated by the user by means of a control bush (22), an elastic sleeve (30) co-operating with the threaded rod or rack and a clutch mechanism (44).
